Implant Prosthesis design and occlusion consideration

## Part 1

Implant Prosthesis design, we will focus on Emergence profile design of implant and pontic site

- History and evolution of emergence profile
- PET (Partial Extraction Technique)
- Critical and subcritical zone

- Ovate pontic and modified ovate pontic design

- Implant position related emergence profile

## Part 2

Implant occlusion consideration

- Implant protected occlusion - 12 keys
- How to avoid occlusal complications
